# Sens Solutions

Intelligent Systems for Health Prevention

Silvia Gómez
CEO and Co-Founder

#### Antibiotic Multiresistant Organisms

Mutation of bacteria in response to inappropriate use of drugs.

#### Problem

#### **Antimicrobial Resistance (AMR).**

2021, **88M tons** of food were lost (**20%**). 1.47% is spent on monitoring while 20-40k people die from the use of pesticides.

2019, **4.95 million** people died from AMR-related illnesses. 1.27 million as a direct result of AMR.

More mortality than cancer by 2050.

High economic burden: €143 billion in agri-food, €1.5 billion in healthcare, in annual cost and productivity losses in the EU.

How we treat diseases poses a danger to our health in the future.

#### Needs

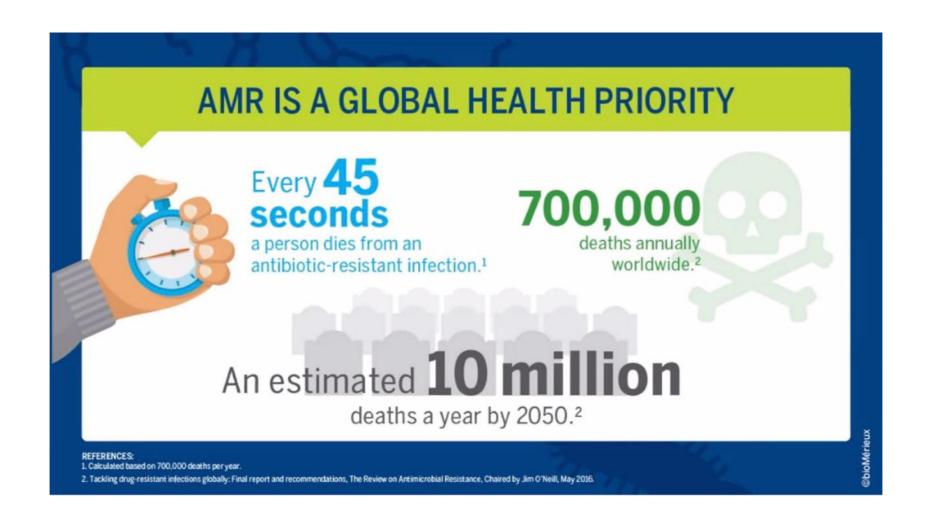

To respond to the Joint Action on Antimicrobial Resistance (EU-JAMRAI) and EU Action plan (2017-2020):

Improve early detection systems to improve treatment efficacy and provide quality care

Ensure an **efficient communication system** to increase **system resilience**.

#### Antibiotic Multiresistant Organisms

## Solutions

#### **Hydro-S3DP**

40 times + faster

PATENTED

PCT nº ES2021/070165

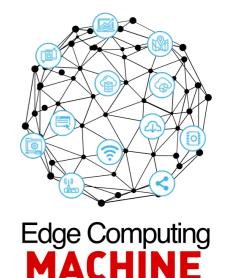

PATENT PENDING

+ 100 bacterias & fungus

### DaaS

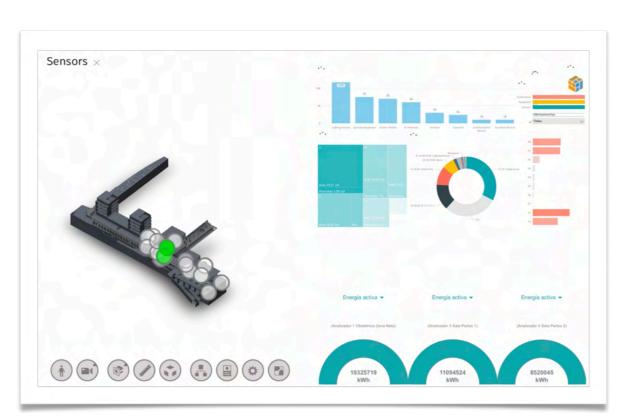

### Information Access

App

Web - login y password

Device

#### WATER

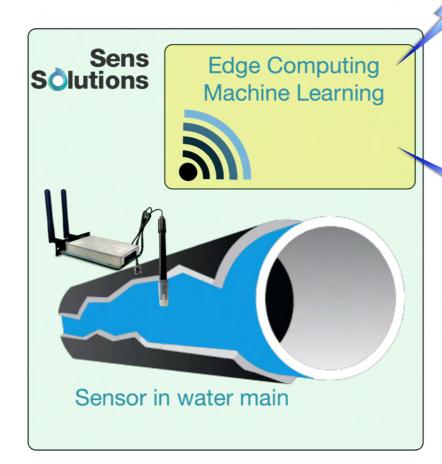

Financed by:

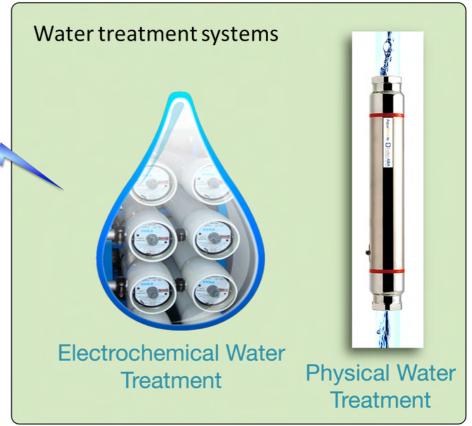

**ACCIÓ** 

Project: SINCRO – Sistema Inteligente de Prevención de Riesgo Microbiológico en Agua (Intelligent System for the Prevention of Microbiological Risk in Water)

#### ADVANTAGES

30% Energy Savings

100% less biocides

70% water savings

Lange Increased average life of the installations

Maximum Savings per year without outbreaks Agri-food Sector - €800K. **Health Sector - €1M.** 

#### **AIRBORNE**

**HOSPITAL DI TRENTO** 

**CLINIK WUPERTAL** 

Confidential document. Property of Sensing Solutions S.L.

#### ADVANTAGES

Agrifood Amortization Time - 1 to 60 days Hospital Amortization Time - 24 hours

Savings per year without Outbreaks

Agri-food Sector - €18M.

Health Sector - 24M € / year (1 device)

How many bacteria can be measured?

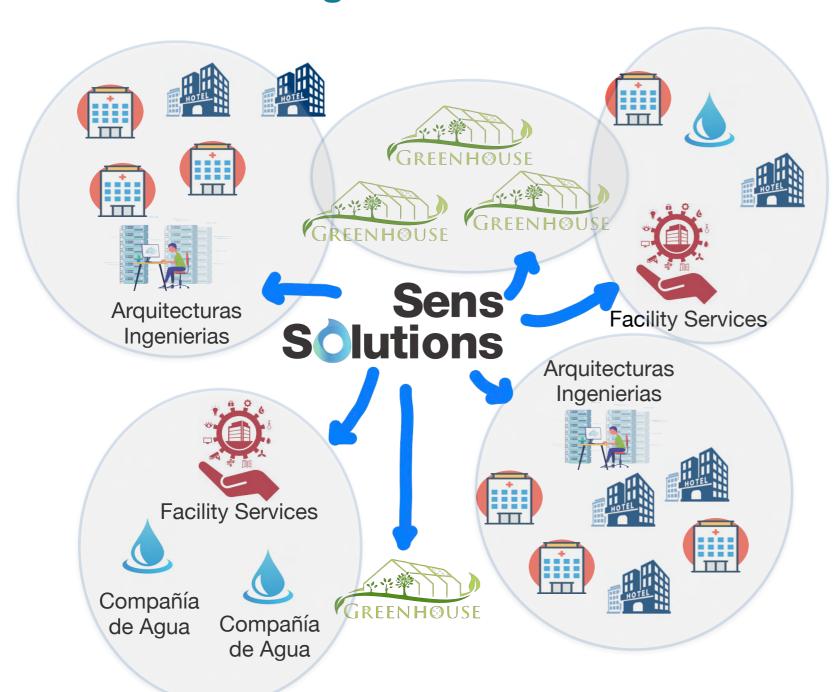

As many as we train.

Each family has its own fingerprint

#### EXPONENTIAL SCALING

#### We scale and generate value

#### **Business Model**
