

Life is an every-day search.

[PLAY VIDEO](#)

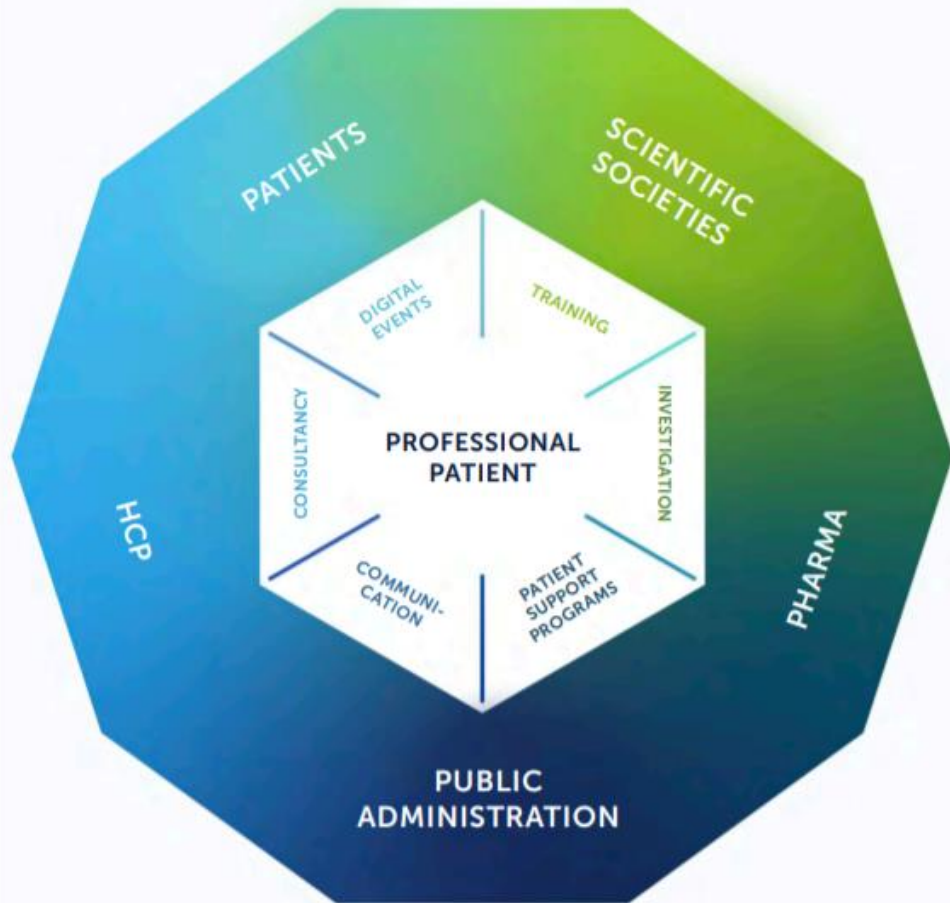

We are committed partners of the biomedical industry.

Our services add value on every phase of the life cycle of a product. The synergy between those services is what drives us as partners in the biomedical industry to collaborate in the real transformation.

In the joint search for the real transformation of the health sector.

We work together with the protagonists of change, facilitating progress to improve clinical practice and people's quality of life.

Evidence quality at every stage of the product life cycle.

From clinical research to launching. From patient programs to positioning and maintaining. Synergies allows us to work on every phase of a product.

01

Clinical Research

We are a full-service CRO research organization. We bring our experience from the early stages of research (phase I) to commercialization and later in real-life studies (RWE).

Evidence quality at every stage of the product life cycle.

From clinical research to launching. From patient programs to positioning and maintaining. Synergies allows us to work on every phase of a product.

06

Communication Agency

We transmit messages with high impact on the receiver using innovation and creativity through omnichannel digital marketing campaigns.

OUR GOAL

To increase our clients' effectiveness through projects and tools that **improve patient quality of life, expand medical knowledge** and **facilitate access to innovative therapies.**

Investigation

Add value to the health sector by improving clinical practice through evidence. We generate evidence and transform it into knowledge so that professionals can apply it in clinical practice.

Identification

Greater identification of needs, improving the skills of professionals, the study of healthcare routes and the patient's ecosystem.

Conversion

Improve conversion by bringing professionals and patients to the fore, curbing therapeutic inertia, generating influence in "KOLs" and valuing products.

Adherence

Transform products into services and guide them to results, valuing the product, defining indicators, empowering the patient and improving compliance and patient segmentation.
